## AUTOMATION INDIA

An ISO 9001: 2015 Company

Manufacturer of Safety Equipment Mining & Industrial

Dist.-Ramgarh, (Jharkhand) - 829122

Mob.: 8917218270, 9238249191 E-mail: automationindiainfo@gmail.com

### **Body Lift Indicator Sensor**

Model: "BLI 2015"

Operators of HEMM, while operation, doesn't know the position of the dump body, whether it is in high or low position. If dumper moves in body lift position, overhead HT Lines may break or hydraulic system may collide and cause fatal accident.

Therefore in order to indicate that the body is in lifted position, Director General Mines Safety vide circular No 5 of 2010 has instructed to install Body lifting Indicator in every vehicle.

To avoid accident, we have developed an electronic safety device "BODY LIFT INDICATOR which gives indication to the operator and also alert in HUMAN VOICE i.e. "

□ □ □ □ □ □ □ □ □ "

### 

body is in normal (rest) position, it will sense its position through magnetic sensor and continue to send signal to the controller unit. There is no mechanical contact between the body and sensor therefore the life of the sensor is very high.

**3. Harness:** A good quality harness suitable for system to connect Controller Unit, & Sensor is available as optional.

#### **Advantages of using Body Lift Indicator**

- ➤ When body is in high position and the dumper moves, it may break the overhead HT line and cause fatal accident. To avoid this situation Body Lift Indicator alerts the operator.
- ➤ When body is in high position, it exerts heavy pressure on hydraulic system and if dumper moves, hydraulic system may fail.

The dumper operator when listen in human voice that "□□□□□□□□", easily understands that body is lifted position and takes all necessary precautions to avoid accident.

TECHNICAL SPECIFICATION:	
AUDIO ALERT	<b>85 dB human voice announcement in HINDI</b> "□□□□□□□" (Option of other language can also be made if required in quantity)
CONTROLLER UNIT	Input voltage 24 -+ 2 V.DC.is required for Controller Unit. Optional 12 -+2 V DC is also available.
SENSOR	To protect from dust & moisture Sensor are sealed with chemicals.
TIMER*	To avoid irritation to operator, a timer defined in "Special Feature" as below is provided.
COLOR	Black

**Special Feature:** As soon as operator lifts the body to high position, Body Lifting Indicator immediately alert in human voice "\\_\\_\\_\\_\" This alarm continues for eight seconds. Since such voice should not disturb the operator, it discontinue for one minute. This cycle is repeated for 5 times for a period of approximately 5 minutes and then human voice stops, whereas LED blinking continue till body is lowered to the normal position.

A button to mute the human voice announcement is also provided in the equipment. Through which operator can mute the announcement, if he desires so.
