

Load Indicator

Manufactured as per DGMS (Technical Circular)/05 dt. 13/10/2010. Our Dumper load indicator and recorder is a fully automatic, it ensures that the dumper is used

in compliance with its design standards and to present over load/under load.

FEATURES:

- Dumper load on board device
- Exterior loading indicator lights to help the loading machine operation.
- Weighing Sensors, one each suspension
- Hardware / software interface
- Fully automatic without the need for human intervention.

OPERATING CONDITIONS:

- Temperature range – 10° C to 70° C
- Humidity – 0 to 95%
- Vibration – 10.55 Hz
- Safely class– IP67

POWER SUPPLY:

- The System is capable to work on 12 V Dc / 24 V DC.
- The power intake is 5 Watts

INTER FACES

- CAN- ISO11898
- RS 232 – +/- 8 V (Switch Level)

BENEFITS:

- Be informed of current safety conditions at all times
- Operate within manufacturers limits
- Added safety
- Fast, Simple and easy to calibrate
